1) Solve, by factorising, $x^2 + 8x + 12 = 0$

2) Evaluate 9^{-2}

3) Solve, and show on a number line, $2x - 3 \ge 4x + 5$

4) Work out $4.3 \times 10^6 + 2.5 \times 10^4$

5) Find the gradient of the line joining points (-2, 1) and (1, 13)
